

FOR IMMEDIATE RELEASE

### TLE Takes a Flying L.E.A.P. Into Spanish™

Aug. 2011 – Boca Raton, FL – The Learning Experience is pleased to announce our new L.E.A.P. into Spanish™ program.

Over the past year, the TLE team has been working very diligently on the production of L.E.A.P. into Spanish™, the first program introducing their students to a foreign language. This comprehensive component of their extensive, proprietary curriculum will introduce the children to the Spanish language and culture through songs, games and fun-filled activities.

L.E.A.P. into Spanish™ will allow children to fully explore the language with readers containing rich illustrations, accompanied by a CD that demonstrates proper pronunciations and lively songs that make learning fun! The children will even receive “passports” that they can use to indicate their exploration into the many Spanish-speaking countries they’ll “visit” on their educational journey.

Research has shown that learning multiple languages at an early age improves overall school performance and helps the child develop superior problem solving skills. TLE expects the addition of a creative Spanish curriculum as part of their preschool program to enhance their students’ cognitive abilities and improve their English comprehensive skills.

The program will be ready for implementation just in time for the new school year in September with the experienced TLE staff attending a thorough, program-specific training seminar in August.

Spanish is just the first step allowing the children at TLE to broaden their horizons with the launch of additional language programs planned for the future.

TLE remains committed to providing a cutting-edge curriculum to their students in order to build a strong foundation for them to grow emotionally, cognitively and socially at their own pace. And now L.E.A.P. into Spanish™ presents the children with the opportunity to enter into a new and exciting cultural awakening!
